Frontend Developer

SOFTWAVES - Karachi, Pakistan | Jun 2025 - Present

- Developed responsive websites using **Wix Editor and Velo**, including custom interactions and dynamic content.
- Integrated third-party APIs and created custom forms using **Wix Velo** (JavaScript-based coding).
- Designed pixel-perfect websites using **Webflow's visual editor** with clean, semantic HTML/CSS structure.
- Built fully responsive layouts with animations and **CMS-based dynamic content**.
- Customized **Shopify themes** using Liquid, HTML, and CSS for e-commerce stores.
- Set up **product collections, payment gateways**, and handled basic SEO settings for product visibility.
- Created websites using **WordPress and Elementor/Divi**, including blog setups and custom pages.
- Installed and configured plugins for **SEO, security, and performance optimization**.

Frontend Developer

TECHNOTIES - Karachi, Pakistan | Oct 2024 - Jun 2025

As a **Frontend Developer**, my primary role is to design and develop user-facing features for websites and web applications. My key responsibilities include:

- **HTML5, CSS3, and JavaScript**: Writing clean, maintainable, and efficient code to create visually appealing and responsive web pages.
- **Bootstrap & Custom WordPress Development**: Using **Bootstrap** to build mobile-first, responsive layouts and customizing **WordPress themes** to meet client-specific requirements.
- **Responsive Design**: Ensuring all websites are **fully responsive** and adapt seamlessly
